

Vivacta Limited
Development Scientists - Immunoassay

Vivacta is a young company specialising in the development of innovative in vitro diagnostic devices used to speed up diagnosis and improve health care delivery at the point-of-care.

Using our novel patented piezofilm technology, we are developing a range of rapid, sensitive, whole-blood immunoassay based products for the measurement of clinically critical markers in non-laboratory settings.

We are **looking to recruit Assay Development Scientists** reporting to the Assay Development Team Leader.

Prospective candidates should have a strong background in immunoassay development and be educated to at least degree level or higher with 3+ years experience in IVD assay development.

Excellent communication skills are a pre-requisite as the position involves interacting with a team of multidisciplinary scientists and external contractors.

As a small company, working with larger marketing partners, we are looking for innovative, flexible people with the skills and foresight to ensure our success. We guarantee an open, challenging working environment in which your role and responsibilities can develop as the company expands.

Please send your CV with a covering letter explaining how you can help our aggressive plans succeed and your salary expectations to:

Tim Carter, CEO,
Vivacta Limited, 100 Guillat Avenue, Kent Science Park,
Sittingbourne, Kent, ME9 8GU, United Kingdom
email: tjnc@vivacta.com
phone: (0)1795 419 900
fax: (0)1795-419401

Vivacta is based in a new laboratory facility at the Kent Science Park, a countryside science campus with excellent staff sports and recreational facilities, in the heart of the "Garden of England" between Maidstone and Sittingbourne (<http://www.ksp-uk.com/>).
